1

Introduction

1.1. Challenges

[7, 9].

1.2. Application to soft (origami) robots

Here is the research question.

How can lifelong learning methods be employed to manage the evolving dynamics due to wear and tear in the control of a soft origami robot over its operational lifespan?

Wow, what a research question.

2

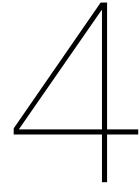

Background and definition

[9, 8, 3].

3

Blackbox methods

[25, 17, 5, 22, 16, 1].

Dual architectures

[12, 19, 20, 10, 11, 21].

5

Storage and retrieval

[23, 18, 13, 20, 2, 15, 24, 21].

6

Architectural expansions

[4, 14, 6].

7

Discussion and conclusion
